

Hygienic Seal[®] fact sheet

When health and hygiene matter most, Con-Serv's own Hygienic Seal[®] grab rails lead the healthcare industry. Featuring an innovative cove shaped Thermoplastic Elastomer (TPE) fitted seal that firms to the rail, the Hygienic Seal[®] provides superior protection against grime and other potentially harmful build up.

About Hygienic Seal[®] Format

Hygienic Seal[®] grab rails are assembled with a 50mm, 3 part machined brass screw-on flange cover with a 5° radius to comply with AS 1428.1:2021 Design for access and mobility.

Hygienic Seal[®] grab rails feature:

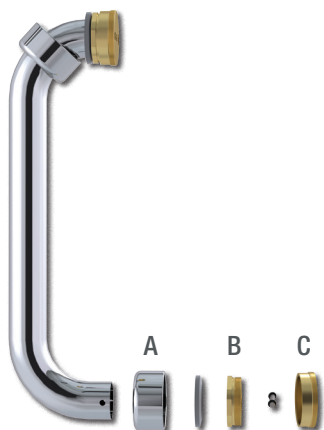

- 32mm x 1.2mm grade 304, 18/8 stainless steel grab rail
- 50mm, 3 part machined brass screw-on flange cover
- AS 1428.1:2021 Design for access and mobility compliant
- Support loads in excess of 1100 N (112kg) when correctly installed
- Quality brass fixings with stainless steel screws included
- Finishes available include Polish Supreme[™], Satin Supreme[™], Matte Black and White.

Advantages of Hygienic Seal[®]

Hygienic Seal[®] grab rails are Con-Serv's recommended flange option. The Hygienic Seal[®] mounting system includes a TPE (Thermoplastic Elastomer) seal that when installed correctly, prevents grime such as soap scum, body fluids, ointments and other aqueous based fluids accumulating behind the grab rail flange covers.

The advantages of using Hygienic Seal[®] grab rails include:

- Unique Hygienic Seal[®] fastening system that prevents grime build up
- Smaller, compact flange cover
- Solid brass wall mount and lock nut
- Solid brass screw on flange cover
- Available in a large range of sizes and selected finishes

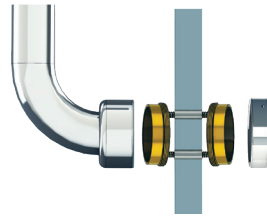

- A Flange cover
B Locking nut
C Screw mount plate

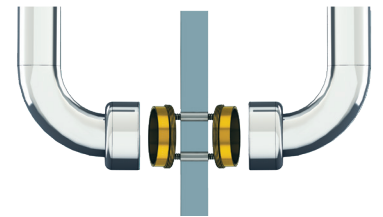

Hygienic Seal[®] Mounting Options

In addition to standard wall mount options, the Hygienic Seal[®] system offers mounting solutions for single sided and back to back fastening for partitions. Hygienic Seal[®] is also available in Con-Serv's Hideaway[™] system for easy removal and replacement of temporary grab rail installations.
