

Hideaway™ Mounting System fact sheet

Con-Serv's Hideaway™ mounting system allows for the ultimate flexibility for areas with changing needs. Inspired by the need for versatile and cost-effective access solutions, the Hideaway™ Mounting System has been designed to enable facilities to install grab rails, toilet backrests and shower seats that can be easily removed and stored when they are not required.

Hideaway™ Mounting System

In response to the industries growing need for flexible accessible solutions, Con-Serv has developed their Hideaway™ Mounting System that allows accessible fittings such as grab rails, to be installed, removed and re-installed as required. The Hideaway™ system is compatible with Con-Serv's Hygienic Seal® and Linear grab rails, backrests and shower seats.

The Hideaway™ Mounting System comprises of Blank End Flanges that utilise the same wall mount plate used to install the grab rail. The installer simply removes the grab rail, leaving the wall mount plate in place, and covers the mounting plate with the blank end flange until it is needed again.

Accessible compliancy

All Con-Serv Hygienic Seal® and Linear grab rails are manufactured to comply with the Australian standard, AS 1428.1:2021 Design for access and mobility. Grab Rails must be fitted to a solid wall or other firm surface and installed by a qualified tradesperson as per the guidelines outlined in the AS 1428.1:2021 Design for access and mobility.

After a Hygienic Seal® or Linear grab rail has been installed and certified, an installer can easily remove and store the grab rail until it is required. Con-Serv's Hideaway™ Mounting System is particularly relevant in complying with recent additions to the AS 1428.1:2021 clause 12.2.4 Backrest appendix (g) which requires backrests in Accessible Sole Occupancy Units be capable of being removed and refitted. Con-Serv Hygienic Seal® Backrests with the Hideaway™ Mounting System meet this requirement.

About Hygienic Seal® and Linear Grab Rails

Hygienic Seal® and Linear grab rails are assembled with a 50mm, 3 part machined brass screw-on flange cover with a 5° radius to comply with AS 1428.1:2021 Design for access and mobility.

- Hygienic Seal® and Linear grab rails feature:
- 32mm x 1.2mm grade 304, 18/8 stainless steel grab rail;
- 50mm, 3 part machined brass screw-on flange cover;
- AS 1428.1:2021 Design for access and mobility compliant;
- Quality brass fixings with stainless steel screws included;
- Available in a range of styles, sizes and finishes.

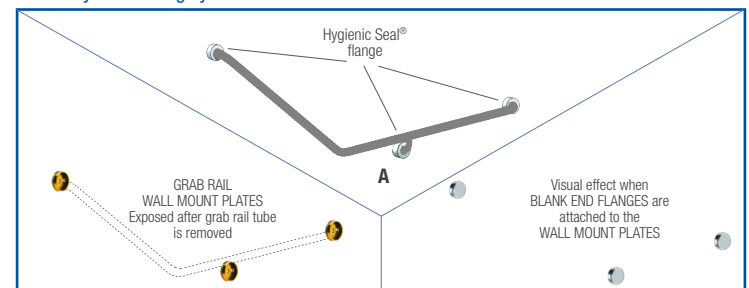

Advantages of Hygienic Seal® and Linear Grab Rails

Hygienic Seal® and Linear grab rails are Con-Serv's recommended flange option. The Hygienic Seal® and Linear mounting system includes a TPE (Thermoplastic Elastomer) seal that when installed correctly, prevents grime such as soap scum, body fluids, ointments, and other aqueous-based fluids accumulating behind the grab rail flange covers.

The advantages of using Hygienic Seal® grab rails include:

- Unique Hygienic Seal® and Linear fastening system that prevents grime build-up;
- Smaller, compact flange cover;
- Solid brass wall mount and lock nut;
- Solid brass screw on flange cover;
- Available in a large range of sizes and selected finishes.
